"Les buts monumentaux de la Compliance". (Compliance Monumental Goals) Cycle of scientific manifestations 2021

on the January 22, 2021

Hotel de Lauzun à Paris

This cycle of scientific manifestations on Les buts monumentaux de la Compliance will start on January 2021 and goes until Novembre 2021.

Like the previous cycles devoted to the general theme of Compliance and aiming to build a "Compliance Law", intended like them to be published in the [Regulations & Compliance](#) collection, this cycle addresses a particular aspect of this branch of Law in progress. to develop, which was applied even before it was conceived. The Compliance mechanisms having preceded the conceptualization of this way of doing things, the "[Compliance Tools](#)" having been the subject of the previous cycle of conferences, this new cycle addresses what characterizes Compliance : *Les buts monumentaux de la Compliance (Monumental Goals of Compliance)* .

This cycle of scientific manifestation will take place in parallel with the cycle of conferences on the theme of [La juridictionnalisation de la Compliance \(Jurisdictionalisation of Compliance\)](#)

The notion of "monumental goals" was proposed in 201. It is central in the compliance mechanisms in that they can only claim to constrain and cost those in which they are inserted in that they tend to achieve goals whose substantial quality is to be "monumental" . This notion is not self-evident, having to be justified, detailed, put into perspective and concretely illustrated, a series of conferences organized by numerous universities is therefore devoted to it.

These various conferences will be held in several places, according to the part taken by the various university structures which bring their support to the *Journal of Regulation & Compliance (JoRC)* for the realization of the cycle. This will result in two collective books, one in French: *Les buts monumental de la Compliance*, the other in English: *Monumental Goals of Compliance*.

- First scientific Manifestation : 22 January 2021, [Radioscopie d'une notion : les "buts monumentaux" de la Compliance](#), under the Scientific Direction of Benoît Petit and Christophe André, Université Versailles - Saint-Quentin:
