Record of space case-law, by Lucien Rapp, Delphine Miramont and Jean-Marie De Poulpiquet

ON THE MARCH 1, 2019

Revue Française de Droit Aérien et Spatial
(RFDAS). Volume 288 - no. 4 2018. Quarterly
publication Review of space case-law from
page 341 onwards

The French Aerospace Law Journal (RFDAS) was founded in 1946 with a triple objective :

- Study the problems arising within aerospace law,
- Express a French perspective on aerospace law,
- Inform readers of changes in aerospace law in France and further afield.

On this basis, each issue focuses on the following areas:

- Theory - feature articles by French-speaking legal experts;
- Legislation - French, European and foreign statutes and regulations and international treaties ;
- Case-law - a collection of the most important French and foreign judgements with annotations .
- Conferences and conventions - a round-up of the main national and international events ;
- Bibliography - a list of recently published books and journal articles.
