Ressources

The IDETCOM has a collection of resources available for carrying out studies within its research areas.

- **SPACE LEGALTECH**: first legal research platform in the world dedicated to space law.
- **Science watch**: for conducting research on various subjects, identifying sources of relevant information in specific disciplines or topics.
- **Documentation centre**: IDETCOM has a documentation centre open to PhD students and those in their second year of a master's degree programme. Lecturers can access specialised documentary resources on the institute's topics of research (Space, Territory, Culture and Communications).
- The documentary resources contain a list of dissertations with their abstract.
