SPACE LEGALTECH

SPACE LEGALTECH is the first legal research platform in the world dedicated to space law.

This innovative platform, created by the SIRIUS Chair, allows the user to access all space legislation and regulations throughout the world by means of an interactive map. The user can browse statutes, decrees, ordinances, licences, launches, registrations, control and safety of space objects, etc.

SPACE LEGALTECH covers over 100 countries, 250 referential legal texts and 7 major space agencies, making it an important work tool for legal experts looking to closely follow the developments and trends of space activities across the world.
