Space Talks 2017: Emerging risks and nascent opportunities in the space sector. Conference organised by the Sirius Chair

ON THE OCTOBER 12, 2017

Hôtel de Région
22 boulevard du Maréchal Juin
Toulouse

SIRIUS workshops are held every year in the Assemblée room of the Région Occitanie hotel. They are organised by the SIRIUS Chair, a business chair linking Toulouse 1 Capitole University, Toulouse Business School, CNES, Airbus Defense and Space, and Thales Alenia Space.

Every year in October, the Sirius workshops provide the chair's (associated or affiliated) researchers the opportunity to report on the state of their investigations to external participants. Such gatherings revolve around a current topic that is likely to attract the attention of the academic and space industry communities.

Thanks to their audience and the quality of the talks, these workshops have gradually become seen as an international scientific event.

English is the working language of the conference.
